<u>Macro Implementation</u>

There is only 1 Macro implemented to the database.

Note: This is done exactly as planned in the Initial Designs.

- The purpose of this macro is to run two queries that is doing the deleting processes of Bookings. The first query type is an 'Append query' which will store the Booking Detail to the Booking Cancelation Table. The second query type is a 'Delete Query' which will delete the Booking Detail Permanently.

  Macro Name: mrcDeleteBooking
